HISTORIC PRESERVATION STRUCTURAL ENGINEER BOULDER/DENVER, CO

Each building has a story. It's our job to help them to continue to speak. Our clients are as engaged and passionate about rehabilitating and adaptively reusing their structures as we are about respecting historic construction techniques and materials while integrating the safety measures of today. The knowledge of our architects, contractors, and specialists who blend both old and new preservation techniques provide the context to conserve built environment heritage for future generations.

As part of JVA's Historic Preservation Studio you will work with mindful, experienced engineers who are devoted to implementing sensitive solutions for each project. We work across the western United States and our portfolio includes park structures, school-houses, residences, churches, ranch and barn structures, auditoriums, courthouses and city halls, lodges, bridges, kilns, and mining structures.

We are seeking a like-minded professional to join our team. Flexibility and desire to work on multiple projects is essential.

Responsibilities

- Investigate historic and existing structures
- Write technical structural assessments
- Design treatments, alterations and repairs

Minimum Qualifications

- 5 years minimum experience
- Licensed Professional Engineer - Structural Focus
- Wood and unreinforced masonry design
- Seismic, steel and concrete design
- REVIT experience
- Strong communication skills
